VOLUME CONTENTS

NOS 1/2 FEBRUARY/APRIL

ORIGINAL ARTICLES

V. STOLC. Linkage of neutrophil response to a mutagen gene (Nrm-1) to the agouti locus in the rat 1

Y. MITSUISHI, M. FELLOUS, A. URLACHER, S. MAYER AND M. M. TONGIO. Influence of recombinant interleukin-2 and α- and γ-interferons on the induction of novel class I antigens 9

M. J. STEAR, T. S. POKORNY, S. FRYDA-BRADLEY, Ø. LIE AND R. W. BULL. Genetic analysis of the antigens defined at the third international *BoLA* workshop 21

K. FISCHER LINDAHL, B. HAUSMANN AND J.-L. GUÉNET. Variants of Mta, the mouse maternally transmitted antigen, determined by three alleles of the extrachromosomal gene *Mtf*. 29

G. DE BENEDICTIS, G. ROSE AND C. BRANCATI. Post-translational polymorphism of human IgA identified by immunoisoelectrofocusing 43

R. BARBIERI, C. NASTRUZZI, S. VOLINIA, M. VILLA, R. PIVA, P. GIACOMINI, P. G. NATALI AND R. GAMBARI. Methylation pattern of the HLA-DRα gene in human tissues . . . 51

S. MIYAKE, H. SUGIYAMA, Y. TANI, T. FUKUDA AND S. KISHIMOTO. Identification of recombinational signal sequence-specific DNA-binding protein(s) of M_r 115,000 in the nuclear extracts from immature lymphoid cells lines 67

L. DEGIORGI, A. MATOSSIAN-ROGERS AND H. FESTENSTEIN. Protection of newborn mice from graft versus host disease by maternal pre-immunization 77

M. ROBERTS, J. ALEXANDER AND J. M. BLACKWELL. Genetic analysis of *Leishmania Mexicana* infection in mice: single gene (*Scl-2*) controlled predisposition to cutaneous lesion development 89

M. A. MODICA, G. CAMMARATA AND C. CARUSO. HLA-B8,DR3 phenotype and lymphocyte responses to phytohaemagglutinin 101

D. N. MISRA, H. W. KUNZ, M. SAITO AND T. J. GILL III. Biochemical analysis of the rat MHC class I antigens RT1.A^a, RT1.F^a and Pa 109

H. SPIEKER-POLET, M. SITTISOMBUT, P.-C. YAM AND K. L. KNIGHT. Rabbit major histocompatibility complex IV: expression of major histocompatibility complex class II genes. 123

B. C. SIM, F. G. GROSVELD AND K. M. HUI. Inactivation of the *H-2K1*^{k} gene could involve the substitutions of methylated CpGs. 133

J. MARTIN, B.-Y. WEI, S. SAVARIRAYAN AND C. S. DAVID. Expression of I-A^k_α and allelic restriction on A_α/A_β pairing in transgenic mice 151

NO. 3 JUNE

ORIGINAL ARTICLES

C. POZZI, D. PERUCCIO, A. M. DALL 'OMO, S. D'ALFONSO, P. SAVOIA, M. G. GUERRA, R. MINIERO, M. LECCHI, L. RESEGOTTI AND P. RICHIARDI. Altered expression of HLA-A,B specificities on acute lymphoid and myeloid leukaemia blasts 161

W. P. LAFUSE, S. T. LEE AND C. S. DAVID. Molecular analysis of two recombinant mouse strains with crossovers in the *Eα* recombination hot spot 169

D. M. MCKINNEY AND M. MCMILLAN. Molecular analysis of H-2 class I molecules expressed on the UV-induced tumour 1591 177

S. LARSEN, J. HILSTEAD, B. K. JAKOBSEN, A. SVEJGAARD, B. MARNER AND H. WORNING. Insulin-dependent diabetes mellitus secondary to chronic pancreatitis is not associated with HLA or the occurrence of islet-cell antibodies 189

A. AMOROSO, G. MAZZOLA, L. CANALE, I. BORELLI, A. M. DALL 'OMO, E. S. CURTONI, N. ANSALDI, P. FUSCO, G. ELIA AND C. BARBERA. HLA in Juvenile Dermatitis Herpetiformis: clinical heterogeneity correlated with DNA and serological polymorphism. 195

BOOK REVIEWS 207

NOS 4/5 AUGUST/OCTOBER

PREFACE 213

INVITED LECTURES

D. J. ANSTEE. The nature and abundance of human red cell surface glycoproteins . . . 219

C. G. GAHMBERG. Biochemistry of rhesus (Rh) blood group antigens 227

R. ORIOL. Genetic control of the fucosylation of ABH precursor chains. Evidence for new epistatic interactions in different cells and tissues 235

P. TIPPETT. Serologically defined Rh determinants. 247

W. M. WATKINS. Monoclonal antibodies as tools in genetic studies on carbohydrate blood group antigens 259

COORDINATORS' WORKSHOP REPORTS

R. ORIOL, B. E. SAMUELSSON AND L. MESSETER. ABO antibodies-serological behaviour and immuno-chemical characterization 279

D. J. ANSTEE AND E. LISOWSKA. Monoclonal antibodies against glycophorins and other glycoproteins 301

P. TIPPETT AND S. MOORE. Monoclonal antibodies against Rh and Rh related antigens 309

B. M. KUMPEL. Functional activity of human Rh monoclonal antibodies (MABS) . . . 321

D. VOAK AND U. NILSSON. Report of studies on monoclonal anti-IgG antibodies. . . . 331

D. Voak and U. Nilsson. Report of studies on monoclonal antibodies (MABS) to complement components 337

B. E. Samuelsson and L. Messeter. The future of MABS workshops and the future of blood banks 343

Appendices

Appendix A 349

Appendix B 355

Appendix C 359

NO. 6 DECEMBER

Original Articles

C. J. Kroco, A. Gores, C. S. David and Y. M. Kong. Immunogenetic aspects of human thyroglobulin-reactive T cell lines and hybridomas 361

G. Pomier, M. Vindimian, J. C. Healy and J. C. Le Petit. Increased interleukin-2 receptor affinity in normal HLA A1 B8 DR3 subjects 371

F. T. Christiansen, G. C. Saueracker, A. L. Leaver, K. Tokunaga, P. U. Cameron and R. L. Dawkins. Characterization of MHC ancestral haplotypes associated with insulin-dependent diabetes mellitus: evidence for involvement of non-HLA genes . . 379

N. Zavzava, E. Westphal and W. Müller-Ruchholtz. Characterization of soluble HLA molecules in sweat and quantitative HLA differences in serum of healthy individuals 387

H. Sugiyama, T. Komori, Y. Minami and N. Sakato. V_HDJ_H to J_H joining is not blocked in μ-chain-producing pre-B cells, implying the breakdown of allelic exclusion 395

Short Communication

A. Weetman and R. McCorkle. Evidence against extended DR3-related haplotypes in Graves' disease 403

T. Crepaldi, S. D'Alfonso and P. Richiardi. IEF analysis of HLA molecules immunoprecipitated by putative anti-class I-like alloantisera 409
